Experience

Software Engineer

Abridge

July 2026 – Dec. 2026

New York City, NY

- Joining the Platform team to work on infrastructure and deployment tooling

Software Engineer Intern

Nextdoor

May 2025 – Aug. 2025

San Francisco, CA

- Optimized Nextdoor's canary deployment pipeline, contributing an open source PR to Argo Rollouts (CNCF Kubernetes project) removing hard-coded pod thresholds, reducing release latency by 11% across 4+ microservices
- Designed and deployed a Datadog-based observability layer with per-cluster agent scraping, improving canary telemetry across 6 services and cutting incident triage time by 30%
- Implemented traffic-shifting and service-mesh routing via subset-based DestinationRules, extending Argo Rollouts through an open source contribution, enabling A/B testing of experimental images in production across 2 services

Software Engineer Intern

Enova

June 2024 – Aug. 2024

Chicago, IL

- Developed a backend API in Go to ingest GitHub webhook metadata and trigger automated Slack notifications, accelerating the organization's code review pipeline by 42%
- Designed and normalized 7 PostgreSQL tables to track PR metadata and API subscribers, reducing redundant queries by 30% and improving long-term data storage efficiency
- Integrated Datadog service metadata logging, surfacing adoption metrics across 23 developers within 3 weeks of launch and establishing observability for future instrumentation

Software Engineer Intern

Nextcloud

Nov. 2023 – May 2024

Stuttgart, Germany

- Built a PHP API enabling extensible file metadata storage in MySQL, expanding core product functionality and supporting two new file-information display modes used by enterprise customers
- Enhanced frontend accessibility and keyboard navigation across 14+ Vue.js components via focus-traps, event listeners, and ARIA-aligned semantics, contributing to two university-level partnerships

Education

University of Illinois at Urbana-Champaign

Bachelor of Science in Computer Science and Mathematics

May 2026

GPA: 3.75

Leadership

B[U]ILT: Black, Indigenous, and Latinx in Tech

Secretary

April 2025 – Present

University of Illinois Urbana-Champaign

- Grew active membership by 20% and boosted newsletter CTR by 30% through targeted communication and automated onboarding workflows using Google Forms + Sheets
- Owned end-to-end logistics for 10+ technical and social events per semester, ensuring smooth coordination, room scheduling, external partner collaboration, and attendee engagement for a 50+ member organization

Projects

Workout Tracker and Gym Logger | Go, Firebase, React, Docker | GitHub Repo

March 2025 – Present

- Built a full-stack workout logger for tracking lifting progression as a single deployable artifact – a Go backend serving a compiled React frontend – containerized via a custom Dockerfile and deployed to Railway
- Implemented a CI/CD pipeline using GitHub Actions with lint, test coverage, and endpoint coverage checks, plus Railway's deployment gate to validate successful container builds before release

Technical Skills

Languages: Go, TypeScript, JavaScript, Python, Java, PHP, C, C++, SQL (PostgreSQL, MySQL)

Technologies: Kubernetes, Docker, AWS, GCP, Terraform, Argo Projects, Prometheus, Datadog, Helm, React, Vue, Next.js, Tailwind CSS, Git, CI/CD (GitHub Actions)
